

We are pleased to provide the following drop-ship codes for Ford Motor Company. Entering these codes with a new chassis order will allow the Ford dealer to have a chassis drop-shipped from Ford manufacturing plants to an EBY facility to save time and money on transportation. EBY will provide an Interim Pre- Delivery Inspection (PDI) after installing a custom truck body and before releasing the vehicle. The selling Ford dealer will be responsible for making sure that a full PDI is performed before delivering the completed vehicle to the buyer.
